Just like the rest of balers, these semi-auto paper balers and plastic balers are divided into two types: small and large. The smaller ones are 750*850*300-1700mm in size which well suited for waste paper recycling. These paper balers are popular in cardboard mill, paper mill, and printers to recycle paper waste with a recycling rate of less than 1ton per hour by manual strapping. However, the larger ones are plastic balers or heavy-duty PET bottle balers having a size of 1250*1100*1700mm. These plastic balers are used in recycling centers for recycling and compressing hollow plastic bottles and rigid plastics. The motors of small and large semi-automatic baling machines generate 18.5 kilowatts and 45 kilowatts power, respectively.

The specially designed heavy duty close-gate of these paper baler machines and plastic
