

Shaanxi Nick Machinery Equipment Co.,Ltd

Address: East Qunsheng Road Wuxi City, Jiangsu, China

NK1070T40 MSW Cardboard Box Baler Machine

The MSW vertical cradboard box baler has good rigidity and stability beautiful appearance. convenient operation and maintenance, safe and energy-saving, and low investment cost of equipment basic engineering. It can greatly reduce transportation costs. It is widely used in various waste paper mills. waste recycling companies and other units and enterprises. It is suitable for packaging and recycling waste paper, plastic straw. etc. The vertical cradboard box baler improves labor efficiency and reduces Good equipment for labor intensity. labor saving. and reduction of transportation costs, and suitable models can also be tailored according to needs

Features

- 1. MSW Vertical cradboard box baler baler is used to squeeze waste paper and similar products under normal conditions and pack them with special packaging belts to greatly reduce their volume.
- 2. There by reducing transportation volume, saving freight, and increasing benefits for enterprises purpose.
- 3. Used for packaging of waste paper (cardboard boxes. newsprint. etc waste plastics (PET bottles. plastic films, turnover boxes. etc.), straw and other loose materials.

Shaanxi Nick Machinery Equipment Co.,Ltd

Address: East Qunsheng Road Wuxi City, Jiangsu, China

Model	NK1070T40
Hydraulic power	40Ton
Packaging size (L*W*H)	1100*700*500-900 mm
Feed opening size (L*H)	1100*500mm
Chamber Size (L*W*H)	1100*700*1450 mm
Capability	5-8bale/hour
Voltage (can be customized)	380V/50HZ
Power	11KW/15HP
Machine size (L*W*H)	1600*1100*3150mm
Weight	1800Kg

The type MSW cradboard box baler has the characteristics of convenient operation and maintenance, safety and energy saving and low investment cost of equipment basic engineering. In terms of installation, the vertical cradboard box baler does not require foot screws during installation, and only needs to choose a stable ground. In terms of power, some models support diesel engine power. When MSW the vertical cradboard box baler s used in places without power, diesel engines can be used as power. In terms of structure, the pusher cylinder and the pusher head of the MSW vertical cradboard box baler are connected by a spherical structure, which has a good reliability and long service life of the oil seal At the same time, there is a distributed shearing knife at the feeding port, which has high shearing efficiency Shaanxi Nick Machinery Equipment Co Ltd. has been committed to the research, development and manufacturing of cradboard box

balers and hydraulic balers for many years. and has complete after-sales services. If necessary, contact www.nkbaler.com
