

Features

When recycling all kinds of old clothes and other materials, in order to better pack these materials, special clothing balers, used clothes baler are used.

This is a very practical packaging equipment, hydraulic baler machine, which can quickly compress various fluffy materials effectively and quickly, resulting in better packaging efficiency.

The textile baling press machine force is widely used in various garment factories, garment recycling stations and other units and enterprises. It is suitable for packing and recycling textiles and fabric strips. It is a good baling machine equipment to improve labor efficiency, reduce labor intensity, and reduce transportation costs.

Model	NK120LT
Hydraulic power	120Ton
Packaging size (L*W*H)	1100*750*1250-1350 mm
Feed opening size (L*H)	1100*750mm
Chamber Size (L*W*H)	1100*750*1860 mm
Bale weight	450-550Kg
Capacity	10-12 bale /H
System pressure	25Mpa
Packing materials	Cross packing
Packing way	Front-Back 5 pcs/ Left-Right 2 pcs
Voltage	380V/50HZ
Power	18.5KW/25HP
Machine size (L*W*H)	1850*1200*5060mm
