

## NKOT120 Scrap Tyre Balers Machine

Tire Baler machine called Tyre baler, used for scrap tire ,small tire ,car tires ,truck tire ,OTR tire compression ,and make the bale tight and easy to loading in container for transportation.

### Features:

1. Hydraulically driven door opening, safe operation, convenient opening and closing
2. Two split platen with movable connecting rod to prevent platen deformation when pressing uneven material
3. The whole system manual control, long service life, simple operation
4. Retractable retaining jaws prevent bag from bouncing back after compaction
5. Adopt hydraulic system
6. Mainly using Schneider electrical components
7. Automatic chain baling machine, simple operation, high efficiency
8. Front and rear doors, convenient for bundling and unpacking

Model	NKOT120
Hydraulic power	120Ton
Packaging size (L*W*H)	1400*700*700-1100 mm
Feed opening size (L*H)	1400*600mm
Chamber Size (L*W*H)	1400*700*1700 mm
Capability	5-6 bale/hour
Bale weight	500-700Kg
Voltage	380V/50HZ
Power	15KW/20HP
Weight	4500Kg

## How to choose a suitable tire baler manufacturer?

### 1. The cost-effectiveness of the product

At present, there are many types of tire balers on the market, and the choice of tire balers depends on the cost-effectiveness of the products. All consumers hope to buy tire balers with high quality and low price.

When buying a tire baler in the market, you must analyze and compare the products of tire baler manufacturers through various aspects. Some tire balers are fast in packaging. Compared with the previous manual packaging, labor costs are greatly saved, and the operation is simple. , Just a brief explanation, workers can operate.

### 2. Product after-sales service

After understanding the basic theoretical knowledge of some enterprises of tire balers, we also need to have a certain understanding of its after-sales service. Today's customers also attach great importance to after-sales service. After-sales service cannot be ignored. Excellent tire balers will provide Very good service.

If the machine fails, they will patiently explain to you that non-human factors will return the tire Baler to the factory for maintenance within a certain period of time. The company registers customer information when purchasing, regularly informs customers of the usage, and responds to customer feedback and needs in a timely manner. Provide personalized service.

Since the development of NICKBALER, its products are exported to more than 60 countries and regions, with a total of more than 150 models of various hydraulic balers, which can support product customization. [www.nickbaler.com](http://www.nickbaler.com)
